

Payment Security & PCI Compliance

MK Tours is fully PCI DSS compliant.

We take the security of your payment information seriously. All card payments made through MK Tours are processed securely by Stripe, a globally trusted payment provider that is PCI DSS Level 1 certified — the highest level of payment security certification available.

Your card details are never stored on our servers. When you make a payment, your card information is entered directly into Stripe's secure environment and is encrypted end-to-end. MK Tours only ever receives a secure token to process your transaction — never your raw card data.

Our platform uses HTTPS encryption (SSL/TLS) across all connections, ensuring that all data transmitted between you and MK Tours is protected at all times.

In compliance with UK financial regulations, our payment infrastructure meets the requirements set by the Payment Card Industry Data Security Standard (PCI DSS), as recognised by major card schemes including Visa, Mastercard, and American Express, and is aligned with the Financial Conduct Authority (FCA) guidance on secure payment processing.

For more information on Stripe's security standards, visit stripe.com/docs/security. **Payment Security & PCI Compliance**

MK Tours is fully PCI DSS compliant, and we take the security of your payment information seriously. Secure Payment Processing

All card payments made through MK Tours are processed securely by **Stripe**, a globally trusted payment provider that is **PCI DSS Level 1 certified**—the highest level of payment security certification available. Data Security & Storage

- **Card Details Never Stored:** Your card details are never stored on our servers. When you make a payment, your card information is entered directly into Stripe's secure environment and is encrypted end-to-end.
- **Secure Tokenization:** MK Tours only ever receives a secure token to process your transaction—never your raw card data.
- **Encrypted Connections:** Our platform uses HTTPS encryption (SSL/TLS) across all connections, ensuring that all data transmitted between you and MK Tours is protected at all times.

Regulatory Compliance

In compliance with UK financial regulations, our payment infrastructure meets the requirements set by the Payment Card Industry Data Security Standard (PCI DSS). This compliance is recognised by major card schemes, including Visa, Mastercard, and American Express, and is aligned with the Financial Conduct Authority (FCA) guidance on secure payment processing.
